

PROJEK PHP.NET.MY

Apa?

- Content Management System (CMS)
- Open Source (GPL & LGPL)
- PHP & MySQL (Dinamik)
- Portal Solution
- Modular & Extensible
- Berorientasikan Objek (OO Approach)

Apa Itu CMS?

*A **content management system** (CMS) is a computer software system for organizing and facilitating collaborative creation of documents and other content. A content management system is frequently a web application used for managing websites and web content, though in many cases, content management systems require special client software for editing and constructing articles.*

- Wikipedia

Kenapa?
